I paid for a year membership but was only able to use 3 or 4 months Ifit said unless I can prove someone said that, they will not honor what I was told.. On top of everything you can not watch anything on the screen (Netflix or youtube) as it not an option for the machines sold in the Middle East.. 75 it is ridiculous Upgrading the review from 1 star to 3 star because the customer service answer soon compromising to refund in full.. If I knew that those workout were not going to be available, I wouldnt have opted for the biggest screen.. I will not pay twice for something I already paid for but was unable to use Close to half the time I want to use it IFIT gives me some kknnd of error and prevents it from starting.

Walmart should have a clear sign that says require membership of iFit clear and detailed by machine.. Ifit And Nordictrack Free With MyThank goodness I didnt pay for this program - I got a year free with my Nordic Track.. I requested a refund no one will respond they will not return emails only interested in sales of big ticket items.. I found Week 1 Workout B and Week 2 Workout A And NOTHING else for a beginner I did not saw anything saying they will autorenew the membership and now a year later I received the surprise of having a debit for autorenew in the amount of 421. They mark your case as resolved before they even respond to you Less than two moths later I received a message to update IFIT, after that most of the work outs that were on the machine are gone and you can not schedule the few left without getting annoying messages to up your subscription.. I still consider they should be more transparent at the time of signing regarding there will be auto renewal and the amount of money that will be charged.. Ive already had to have them replace the console (which took weeks) If I knew this I would NEVER have considered buying this worthless product.. Initially, you could either do the 34 predefined workouts (these are advertised on the body of the machine) along with the iFit.. It is seriously the worst commercial software I have ever encountered Stay Away Ifit And Nordictrack Free With MyIfit And Nordictrack Software I Havelfit And Nordictrack Software I HaveA perfectly good mechanical machine will not even move unless youre connected to the internet (which I am) Going to buy a dumb treadmill now that turns on with a switch.. It is totally unorganized and there are not programs that you can find and follow Its crazy I was looking for a beginners rowing program.. The techs were very nice although 4 of them said 4 different things including blaming it on Spectrums ports. 34bbb28f04 [Photoshop Cs5 Mac Download](#)
