About This Game

Mining Rail is a roller coaster game.

Get in your mine cart and drive at high speed along the railway track, getting through the mine to the exit and down to the valley. The track is steep, the curves tight and the force tries to take your vehicle out of the bend. A good pilot now shifts the weight, tilts the mine cart in the curve and manages every tricky part of the track.

- exciting high speed downhill driving
- real roller coaster feeling
- over- and underground driving
- world generator for fixed and random tracks

A mine cart pilot must qualify for his missions and is rated by the number of tasks completed. You have to be fast, accident-free and efficient in collecting gems. Only then you will get access to the next mining world.

-
- 110 fixed tracks
 - 11 worlds
 - 5 levels
 - 1650 tasks
 - 30 upgrades
 - endless number of random tracks

Your mining operations will take you to the most exciting mine tracks in the world. From the Black Forest via the Volcano Islands to the Blue Grottoes, your driving skills become a legend. But every experienced mine cart pilot has to face at regular intervals the challenge of the Ghost Mine.

- Black Forest
- Mediterranean
- Fertile Plain
- Nordic Coast
- Volcano Island
- Mining Mountains
- Fire Caves
- Iron Valley
- Blue Grottoes
- Desert Mountain
- Ghost Mine

The dark Ghost Mine will not be entered by humans. Here live the dead, ghosts, giant spiders and vampire bats. There is no electric light and some sections are very steep.

- 10 fixed tracks Ghost Mine
- 5 levels
- 30 tasks
- endless number of random tracks in Ghost Mine

Find your way through the Ghost Mine and the most impressive mines around the world and start a journey from deep inside the mountains down to the safe station at the end of the track.

Title: Mining Rail
Genre: Action, Adventure, Casual, Racing

Good, Nice Smooth Graphics,

A+A+A+. This game is one of THOSE games, the sort that's clearly someones pet project in Unity that eventually got fleshed out to the point where they felt confident enough to release it. I will say this, it's not a bad game at all nor a bad concept but it needs more fleshing out. For what it is this game is solid and playable while actually taking some skill which is somewhat rare these days. If you need something to spend your time on and don't mind some of the negative traits often associate with Unity you could certainly do a lot worse than Mining Rail.

If I was to offer a piece of advice to the developer though I would say lean into the silliness of the concept. If taken further this game can't be serious, it just can't, the concept will not support it but if you doubled down on the ridiculous nature of the game it could work out very well. Add in some more music options perhaps themed to the levels, more to do in addition to just dodging two or three obstacles, and find your own style\graphics setup outside of Unity standard and this simple game could become a hit. It's just the right mix of a simple concept with competent base gameplay to have real potential.. Its a great idea and fun too worth \u00a310 easy.I would Recommend this game. This is really fun!

First or third person mine cart racing.

A Variety of tracks.

Some upgrades for your cart.

Maybe a bit too expensive...
